To reinstall the permanent filter after cleaning:
1. Open the base air inlet grill and make sure that any plastic packaging was removed from the filter (see Fig. 4).
2. Check condition of the filter and clean if necessary.
3. Make sure the filter is properly installed and rear grill is seated correctly.
4. Check if unit is properly plugged in and outlet is energized.
5. Make sure unit turned ON.
6. Unit will not operate.
   • Check if unit is plugged in and outlet is energized.
   • Make sure unit is turned ON.
   • Replace fuse if necessary.
   • Check if power cord outlet is plugged in.
   • Check power outlet.
   • Unplug unit and plug back in.
   • Check condition of the filter and clean if necessary.
   • Make sure filter is properly installed and rear grill is seated correctly.
   • Line up the Lock icon (®) on the base air inlet grill with the power cord outlet below the rear grill and check at the rear of the air purifier housing. Force the base air inlet grill onto the unit securely. Failure to secure the grill will result in a reduced performance (see Fig. 6).
   • Line up the Lock icon (®) on the base air inlet grill with the power cord outlet below the rear side of the air purifier housing. Force the base air inlet grill onto the unit securely. Failure to secure the grill will result in a reduced performance (see Fig. 6).
   • Check and clean the permanent HEPA-type filter from the air purifier housing to ensure the grill is securely locked in place (see Fig. 4).
• Difficult to attach the base air inlet grill onto the unit.
   • Make sure parts are firmly positioned in place.
   • Check if unit is properly plugged in and outlet is energized.
   • Make sure unit turned ON.
   • Reinstall the permanent filter after cleaning.
**IMPORTANT SAFEGUARDS**

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, or injury to persons.

1. Read all instructions before using the appliance.
2. Do not use this air purifier where the cord or hose is likely to be walked on or pinched by items placed on or against them, or where it can be pulled on or entangled by children.
3. Do not use this appliance in a damp or wet location.
4. Do not allow children to hang on the cord or use the cord as a handle.
5. Do not allow children to use this appliance as a toy.
6. Do not put this appliance near heat sources such as radiators, stoves, or other appliances that produce heat.
7. Always unplug the air purifier before moving or cleaning the unit, and before plugging in a new filter.
8. Do not operate any appliance with a damaged cord or plug.
9. Do not use the air purifier with any solid-state control device, such as a timer, or solid-state speed control device.
10. Never use the air purifier with an auxiliary heat source, such as a stove, heater, or radiator.

**TO SAVE THESE IMPORTANT SAFETY INSTRUCTIONS**

**FEATURES**

**IONIZER**
- The Air-purifier can be turned on by pressing the ionizer button. When turned on, releases negative ions into outgoing air to help the air purification process.
- The optional ionizer naturally improves performance and can be turned on or off as desired.

**FILTERS**
- The HEPA-Type filter removes up to 99.97% of airborne dust, mold spores, and pet dander from air passing through the unit. The permanent filter allows for easy maintenance and is machine washable.
- The permanent filter includes a pre-filter to reduce large allergens and irritants before entering the main filter system.
- The filter system is designed to operate efficiently for 3 to 4 months, depending on usage.

**OPERATING INSTRUCTIONS**

1. Plug into a 120V AC electrical outlet. The ionizer button (yellow LED) will illuminate to indicate which setting is being selected.
2. Use appliance only for intended household use as described in this manual. Any other use not recommended by the manufacturer may cause fire, shock, or injury to persons.

**CLEANING AND MAINTENANCE**

- The air purifier is easy to clean and maintain. Simply unplug, remove plastic bag before use.
- Use a damp cloth to gently clean the air purifier, excluding the filter area.
- Do not use harsh cleaners, etc., as they will damage the product.
- Do not use gasoline, benzine, thinner, or detergents to clean the permanent filter.

**CLEANING / MAINTENANCE INSTRUCTIONS**

- DO NOT submerge in any liquid, pressurized or not.
- Do not clean the permanent HEPA-type filter with water. Gently shake the filter to remove dust. This will allow the filter to operate efficiently for 3-4 months, but will not remove all dust from the filter.
- Replace the permanent HEPA-type filter every 8-12 months or when it appears dirty. Most filters will be dirty by the end of their life expectancy. The inside of the unit contains no user serviceable parts. Call your warranty. The inside of the unit contains no user serviceable parts. Call the manufacturer or an authorized service center for examination and/or repair.

**NOTE:** This air purifier is designed to operate continuously in the same room. To achieve maximum air purification, operate the air purifier at all times that the room is occupied.
