TIPS AND TROUBLESHOOTING

ISSUE SOLUTION

UNIT WILL NOT OPERATE
• Make sure unit is properly plugged in and outlet is energized.
• Make sure unit is turned ON.
• Make sure filters are properly installed and rear grill is seated correctly.
• Make sure nothing is blocking air inlet and filtered air outlets.

DECREASED AIR FLOW
• Make sure parts are firmly positioned in place.
• Check condition of the filter and replace if necessary.

EXCESSIVE NOISE
• Make sure parts are firmly positioned in place.
• Remove plastic bags from filters.

WARRANTY INFORMATION

3 YEAR LIMITED WARRANTY

Sunbeam Products, Inc. doing business as Holmes Consumer Solutions, or in Canada, Sunbeam Corporation (Canada) Limited doing business as Holmes Consumer Solutions (“JOY” or “JCS”) warrants for a period of three years from the date of purchase, this product will be free from defects in material and workmanship. JCS, at its option, will repair or replace this product or any component of the product found to be defective during the warranty period. Replacement will be made with a new or reconditioned product or component. If the product is no longer available, replacement may be made with a similar product of equal or greater value. This warranty excludes defects due to abuse, misuse, unauthorized repair or adjustment, or any other cause beyond JCS’s control.

**FEATURES - OPERATIONS**

When using electric appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, or injury to persons. These precautions include:

1. Read all instructions before using appliance.
2. To reduce the risk of electric shock, plug the appliance directly into a 120V AC electrical outlet. Do not use an extension cord. 

**SAFETY INSTRUCTIONS**

1. Plug into a 120V AC electrical outlet.
2. The purifier should be unplugged before moving or cleaning the appliance.
3. When the purifier is not in use, always turn off the Speed Control Knob to the OFF setting. When high levels of air pollution exist, set the Speed Control Knob to the ON position.
4. The purifier should be used only in a room with a firm level place where there are no obstructions to circulating and filtering the air.

**POLARIZED PLUG INSTRUCTIONS**

To reduce the risk of electrical shock, this product has a POLARIZED PLUG (one blade is wider than the other). The plug will fit into a polarized outlet only one way. If the plug does not fit, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. The use of an extension cord is not recommended.

**CLEANING/Maintenance INSTRUCTIONS**

1. Carefully unpack your Holmes® Air Purifier. Select a firm level place where there are no obstructions to circulating and filtering the room air.
2. The outside of the air purifier can be cleaned with a dry, soft cloth. Do not use any detergent or cleaning solution that contains abrasive cleaners or chemicals.
3. The rear air inlet grill can be removed and washed in warm soapy water (not dishwasher safe). Dry before use. Remove the HEPA-type filter with rails on the unit. Align the clip on the side of the filter to the front panel. This is caused by negative ions exiting the air outlet, evidence of the ionizer's air cleaning feature.
4. After extended use, you may notice dust around the grills and motor housing. These particles take on a negative charge. They exist naturally around us: in the air, water, and soil. Ions are tiny particles that carry a positive or negative charge. They are ionized to provide added filter performance and helps filter the dust.

**POWER Cord INSTRUCTIONS**

The length of cord used in the appliance may provide a shorter or longer cord for installation. If you cannot reach the outlet, use an electrical extension cord. The length of cord used on this appliance was selected to reduce tangling or tripping hazards. The electrical rating of the extension cord must be equal to or greater than the rating of the appliance. For optimum air filtration, operate your Holmes® Air Purifier with the Speed Control Knob set at the LARGE (2) setting. A change in the Speed Control Knob setting to LOW (1) to ON and the button will change to illuminate in blue. After extended use, you may notice dust around the grills and motor housing. These particles take on a negative charge. They exist naturally around us: in the air, water, and soil. Ions are tiny particles that carry a positive or negative charge. They are ionized to provide added filter performance and helps filter the dust.

**FILTER REPLACEMENT INSTRUCTIONS**

1. Turn on the purifier and allow it to run for at least five minutes before changing the filter. 
2. The outside of the air purifier can be cleaned with a dry, soft cloth. Do not use any detergent or cleaning solution that contains abrasive cleaners or chemicals.
3. Remove HAPF30 (A filter) or HAPF300AP (A filter) by pulling it gently towards you and discard it. DO NOT attempt to clean the filter. Note: the purifier will not operate with the low setting. DO NOT ALTER THE BLOWER AIRWAY. 

**HEPA-TYPE FILTER**

Ionizer helps to reduce up to 99% of airborne pollutants, at 2 micron and larger, from the air that passes through the filter system. These include tobacco smoke, household dust, pet dander and pollen.

**GET TO KNOW YOUR AIR PURIFIER**

The purifier is designed to capture and remove bacteria, viruses, and large-particle pollutants, such as smoke, and pet dander to form larger particles. These particles take on a negative charge and may join other charged particles. Negative ions help air purification by attaching and precipitating these particles on surfaces throughout your home.

**WARNING:**

Do not use the fans, motor(s), or the filter for anything other than the purpose for which they were intended. Use of this product in a manner not specified by the manufacturer may create a hazard or cause damage. The length of cord used on this appliance was selected to reduce tangling or tripping hazards. The electrical rating of the extension cord must be equal to or greater than the rating of the appliance. For optimum air filtration, operate your Holmes® Air Purifier with the Speed Control Knob set at the LARGE (2) setting. A change in the Speed Control Knob setting to LOW (1) to ON and the button will change to illuminate in blue. After extended use, you may notice dust around the grills and motor housing. These particles take on a negative charge. They exist naturally around us: in the air, water, and soil. Ions are tiny particles that carry a positive or negative charge. They are ionized to provide added filter performance and helps filter the dust.

**HEP-A TYPE FILTERS**

Ionizer helps to reduce up to 99% of airborne pollutants, at 2 micron and larger, from the air that passes through the filter system. These include tobacco smoke, household dust, pet dander and pollen.

**GET TO KNOW YOUR AIR PURIFIER**

They are ionized to provide added filter performance and helps filter the dust.

**DON'T ALTER THE BLOWER AIRWAY.**

Some types of filters may carry a postage or shipping charge. They are usually ordered in sets of 4, 6 or 12 months. Do not alter the blower airway. This plug will fit into a polarized outlet only one way. If the plug does not fit, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. The use of an extension cord is not recommended. Do not alter the blower airway.
